We are the cybersecurity division of Sagewood Group, Inc., a 19-year-old IT consulting firm. We perform reconnaissance on the cybersecurity market, for businesses and government agencies, to find solutions that are worth putting to the test.

We deliver constantly curated, best-of-breed security solutions that de-risk the bleeding edge technology. We are Passionate about helping organizations protect themselves against the "bad guys"/thieves/hackers, finding unknown threats so that our clients can focus on their core business.

Core Competencies

- Network Detection and Response (NDR)
- Cross Platform Security (XDR)
- Vulnerability Detection
- Penetration Testing
- Data Loss Protection and Data Privacy Protection
- Security Training
- Virtual CISO
- We help keep you compliant (HIPPA, FFIEC, GLBA, PCI, DFARS, CMMC, NIST 800-171)

Main Differentiator

- We partner with 24 of the leading Next-Gen Cybersecurity solution providers to deliver personalized solutions.

Unique Solutions

- Detect *unknown* threats within minutes to hours, instead of the industry average of 315 days!
- Full Containment inside 24 hours.
- Unlimited incident response with full network forensic analysis.
- Full cycle remediation at NO additional cost.
- Zero false positives.

"As a former Fortune 50+ Global CIO & CTO, you can imagine the amount of information I receive from the various technology vendors/manufacturers etc., regarding their disruption and the fit of their technology to solve top-of-mind business problems. Advancements in technology continue to move at such a pace, that it's difficult to stay abreast of the advancements, most especially in the area of information security. That said, I have relied on Alain Nguyen and Amy Cline, Co-founders of CyberReconn to serve as that honest broker focused on the information security space specifically vetting out the various technology providers/market disrupters validating the viability of their technology to fulfill particular gaps and solve problems."

– Becky Wanta
